In some cases groups will claim some costs associated with donated equipment  
 To figure out eligible inkind when operating costs (fuel for example) are claimed as an expenditure use the following method.

Expenditures divided by hours of use = hourly operating costs

Subtract hourly operating costs from eligible hourly rate = eligible inkind hourly amount

**Example**

Tractor \$65hr

Operated for 50hrs, claimed \$500 for fuel/operating costs

500 divided by 50hrs = \$10hr operating costs

\$65hr eligible costs - \$10hr operating costs = \$55hr eligible to be claimed as inkind
